Core Capabilities

IT Consulting Anselux analyzes the customer's business IT needs and then provides a tailored IT solution to address those needs.

Web and Desktop custom application design, development and support, using most programming languages.

Cross Platform Mobile application design and development using Xamarin, Ionic, React Native and PhoneGap (Cordova).

Cloud application development services and support, we specialize in Microsoft Azure and Amazon AWS.

Database development services and support

Blockchain and AI application development.

IT Staffing and Staff Augmentation Anselux provides their clients highly talented IT staff to help them fulfil their project staffing needs.

COTS (Commercial Off The Shelf) application support and maintenance.

Differentiators

- Anselux was formed by former Microsoft software engineers with solid experience in application design, development and testing lifecycle.
- Anselux utilizes a rapid prototyping process which blends well with our client's agile process to provide tailored, on time and within budget solutions.
- Using our knowledge of IT and a focused screening process, we are able to provide our customers with the most talented IT staff members.
